OriginalMD for Specialists

Patrick Long, MD, is a board-certified family physician, fellowship-trained in medical genetics, practicing both in Denver.

Primary Care Membership
ONGOING CARE

One physician who sees the whole picture for adults with complex or inherited conditions. Cost set after an initial visit.

Diagnostic Consultation
A QUESTION OF DIAGNOSIS

Evaluation with comprehensive phenotyping; testing fitted to the question. $850 · 90 min · in person preferred.

Genetic Counseling
A KNOWN RISK, GENE, OR TEST

Counseling, ordering, results, and surveillance. $450 per visit · 60 min · telehealth available.

SEND FOR A DIAGNOSTIC CONSULTATION WHEN YOU SEE

- **Multisystem disease,** several specialists, no unifying diagnosis
- **A hereditary phenotype** never worked up, or **onset decades early**
- **Unexplained metabolic findings:** rhabdomyolysis, hypoglycemia, lactic acidosis
- **A prior result that settled nothing:** a VUS, or negative testing despite suspicion
- **A childhood genetic diagnosis** with no adult genetics care

SEND FOR GENETIC COUNSELING WHEN YOU SEE

- **Hereditary cancer:** young age, multiple primaries, familial clustering
- **A known familial variant:** who else to test, and what each result means
- **ACMG secondary findings** (treatable adult-onset conditions) and **carrier screening**
- **Pharmacogenomic profiling** before or after a difficult medication
- **A result from elsewhere** that needs explaining; **surveillance** for a monogenic diagnosis

Dr. Long assigns the visit type at intake and confirms it with you. When results need a conversation, they are reviewed at a counseling visit; otherwise they come to you in the note.

MEMBERSHIP: A PRIMARY CARE HOME FOR YOUR COMPLEX PATIENTS

One physician, both disciplines
The physician managing **blood pressure** or an **acute illness** also interprets the **genome**.

Time
60 to 90 minutes at first, a **reassessment every year**, and your recommendations in one plan.

Direct access
Patients and your office reach Dr. Long directly: **no front desk, no phone tree.**

BY SPECIALTY: WHICH VISIT, AND WHEN

	GENETIC COUNSELING	DIAGNOSTIC CONSULTATION
Oncology; breast, GYN, general surgery	**Cancer at a young age,** multiple primaries, familial clustering; a **known syndrome variant** (BRCA, Lynch) in the family	**Multiple cancers** or multisystem findings with no syndrome identified; prior testing uninformative
Cardiology	Family history of **cardiomyopathy, arrhythmia, or sudden death;** a known variant; suspected **familial hypercholesterolemia**	**Cardiomyopathy or aortopathy at a young age** with other systems involved and no cause
Neurology	A known **hereditary neuropathy, ataxia, or epilepsy** gene in the family; **pharmacogenomics** for refractory seizures	**Early or atypical** neuropathy, ataxia, movement disorder, myopathy, or epilepsy; **white matter disease; stroke in a young adult**
OB/GYN	**Carrier screening;** a monogenic disorder or hereditary cancer in the family before pregnancy	**Recurrent pregnancy loss** or a maternal multisystem presentation without a diagnosis
Psychiatry	**Pharmacogenomic profiling;** a monogenic disorder with psychiatric features in the family	Psychiatric presentation with **neurological, metabolic, or multisystem** features
Dermatology, rheumatology, PM&R, ophthalmology, orthopedics	A known **connective tissue, skin, eye, or skeletal** diagnosis needing surveillance or family testing	**Hypermobility** with vascular, ocular, or skeletal features; **lens dislocation;** recurrent fever without an autoimmune explanation
Radiology, any specialty	An **incidental finding** with a known hereditary association: renal cysts, aortic dilation, polyposis	Incidental findings **across several organ systems** with no unifying explanation

WHAT YOU RECEIVE

- **A note you can act on,** faxed within **48 to 72 hours**, typically under 24: assessment, rationale, recommendations.
- **Consequences spelled out** for surveillance, treatment, and testing of relatives.
- **Your patient back.** Specialty management stays with you; gene-related management is recommended to you, and carried out only in membership. Referred patients are not solicited for membership.

REFER BY FAX

303-565-4574 Office 720-575-0267

Send the **clinical question**, relevant **records**, and any prior **genetic reports**. Patients are scheduled **within a week**, often sooner. Please do not email records. Patients may also call.

PRACTICE DETAILS

Patients	Adults 18 and older who are not currently pregnant; in person in Denver, or telehealth within Colorado
Payment	Self-pay; OriginalMD does not bill insurance. Testing is separate; patients may use their insurance at outside laboratories
Medicare	Seen under a private contract; Dr. Long has opted out of Medicare
Medicaid, TRICARE, VA	Unable to see patients enrolled in Medicaid, TRICARE, CHAMPVA, VA health benefits, or other government health programs
